# Company Overview

CellSonic is a manufacturer and distributor of biophysics technology. It is the culmination of over 20 yrs of innovation by world leading scientists.

**CellSonic Ltd.**  
MedTech 

CellSonic Ltd. is registered in the UAE, Ras Al Khaimah with its factory in Pune, India. CellSonic distributes globally through dedicated distributors in each country delivering training, marketing and logistics support.

Our products are crafted with the highest quality components bringing you the latest biophysics has to offer without drugs, surgery or side-effects.

# The Problem

## Market Demand

Chronic disease is the leading cause of death globally they account for over 80% of all deaths in Morocco. Problem is compounded by only 1.5 healthcare workers per 1,000 people.

Kidney disease, cancer, hypertension, and diabetes consume over 73% of all spending on long-term illnesses in Morocco. 2.57 million older Moroccans are living with at least one chronic disease.

**80%**  
of Death Rate

# Current Treatment Failing System

The current treatment options for chronic pain and diseases are limited with low success rate. Ultimately the medical system has no cure and is currently managing an ongoing problem with high expenditures, limited staff, high downtimes and suffering.

## 01. Dependancy on Pharmaceuticals

Pharmaceuticals mask pain without adressing the underlying cause of the problem resulting in a long term dependancy and systematic side-effects.

## 02. Surgery Limitations

For lower back pain, spinal fusions cost \$50-100k US dollars with a 20-40% failure rate creating more dependacy on pharmaceutircals and lifelong disability.

## 03. Chronic Management

For chronic pain, standard physio and injections cost \$10-30k per patient per year without ever achieveing strucutral resolution.

# Our Solutions

Explore our full product catalogue at [cellsonicltd.com](http://cellsonicltd.com)

Biophysics range for:

- Medical Market
- Beauty Market
- Veterinary Market

**Medical & Veterinary  
Chronic Disease**

**De-wrinkling  
Beauty**

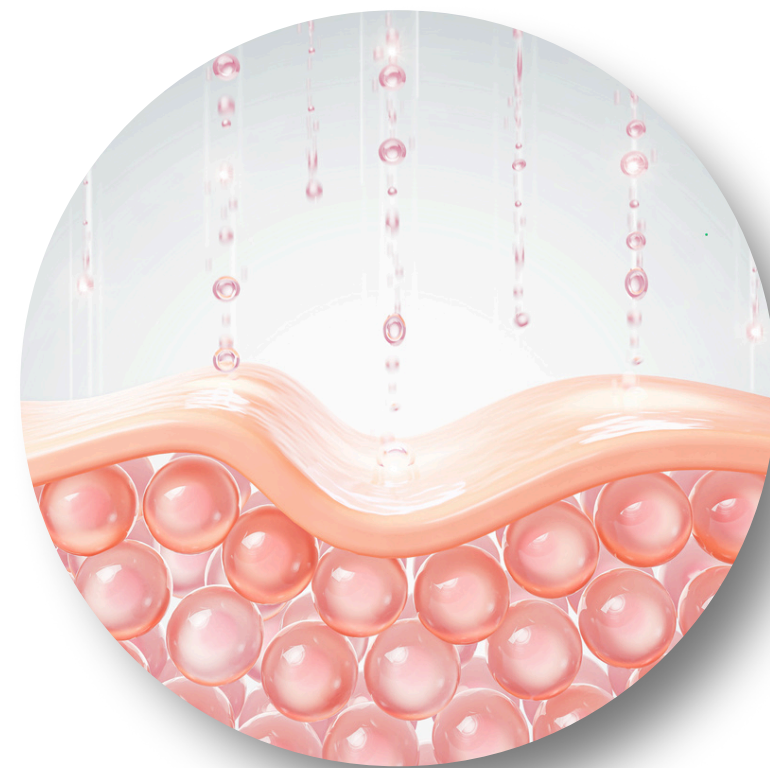

**Fat Loss  
Beauty**

# Our CellSonic VIPP Biophysics Technology

CellSonic VIPP technology is based on the ESWT pressure pulses developed forty years ago to pulverise kidney stones. CellSonic has advanced this technology to a compact, reliable and affordable machine.

By flashing 25,000 Volts across electrodes, the switching produces a true shockwave that passes through the body producing 3 healing forces. No drugs, surgery or side-effects.

Pressure Pulse

Electrical Field

Light

# CellSonic VIPP

# Features & Benefits

CellSonic's very intense pressure pulse (VIPP) passes through bone delivering a true shockwave. Infection is killed, immune system triggered and cell voltage restored from -10mV to -75mV.

Electrical field influences cell voltage

Pressure Pulse bursts bacteria & viruses

Shock splits water into healing oxygen and hydrogen

Restore  
Cell  
Voltage

Generate  
electrolysis for  
oxygen &  
hydrogen

Kills infection  
& triggers  
immune  
system

# Case Study

## Lower Back Pain

Patients with Chronic Non-Specific Low Back Pain (CNSLBP) — averaging a 5-year history had failed NSAIDs, physiotherapy, and cortisone injections. CellSonic VIPP protocol was implemented at energy level 4-6 with 500-1,000 shocks per treatment, 1-2 times a week for 4 weeks.

### 01. Treatment Results: 80% Success

Achieved full restoration of range of motion and return to normal daily activities without analgesics or anti-inflammatories. 80% reduction in pain scores (VAS scale) within 4 weeks.

### 02. CellSonic VIPP 3 Key Mechanisms

The high-intensity pulses **deplete Substance P** (the pain neurotransmitter), effectively "rebooting" the pain signal to the brain. Mechanical pressure **flushes inflammatory metabolic waste** from spinal tissues into the lymphatic system, restoring blood flow. **Cellular energy is restored** from a damaged -20mV state back to a healthy -75mV, enabling genuine tissue repair, regeneration by mitochondrial ATP reset.

### 03. Treatment Advantages

Non-invasive, drug-free treatment. No surgery, no injections, no side effects. Works on patients who have already failed conventional treatments. Results in 4 weeks, not months or years. 5-minute treatment session per patient

# Case Study

## Diabetic Ulcer

In a study at the University of Tuebingen of 75 diabetic ulcers, 92% showed significant positive response for wounds that had remained open for up to 50 years, proving that the VIPP protocol can override decades of chronic biological stalling where standard care failed.

The study documented the transformation of capillary network formation (angiogenesis), physically rebuilding the blood supply to the wound site.

75 Patients

92% Success

Blood Supply

Drug, Surgery & Side-effect free

# CellSonic Library Clinical Studies

CellSonic sits at the centre of a global network of independent practitioners reporting their successes. CellSonic has no side-effects, so new reports appear for more disease as desperate cases enter clinics.

Full Library can be accessed on [cellsonicltd.com](http://cellsonicltd.com)

1. Stage 2 Breast Cancer
2. Stage 4 Choriocarcinoma
3. Rapid Biomarker Response — Stage 3 Abdominal Cancer

4. Trauma Induced Arthritis
5. Diabetic Wound Healing — Saves Amputation
6. Resolution of Chronic Neurological Stagnation

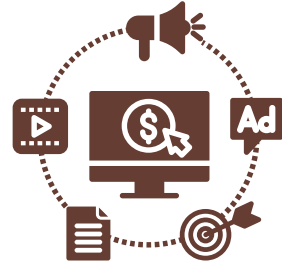

A growing body of clinical evidence supports the effectiveness of pressure pulse therapy across multiple medical specialties.

# Services We Offer

CellSonic Ltd. has a global team of experts who form a support network of knowledge.

We build a strong long term relationships with clients from purchase decision to success with patients.

## Digital Marketing

CellSonic has a Marketing content collection for distributors, practitioners to sell machines, treatments for conferences, events, social media and website creation.

## Brand Strategy

CellSonic has a tried and tested model to communicate treatment features and benefits. Approach and model to operating a clinic, marketing and financing is shared.

## Training

Full training and certification for use of all CellSonic technology is delivered face to face or virtually. CellSonic's large library is available to all practitioners with standardised protocols.

# Global Client Clinics USA

## Centre for New Medicine

Dr Leigh Conneally runs the largest cancer clinic in America. She is world renowned and recognised for her approach to cancer. She has selected CellSonic VIPP for her clinic with success.

[cfnmedicine.com](http://cfnmedicine.com)

## Dayspring Cancer Clinic

Dr Andrew Dickens runs his own cancer clinic receiving patients from across the globe for a root base approach to cancer. He has selected CellSonic VIPP for his clinic.

[dayspringcancerclinic.com](http://dayspringcancerclinic.com)

## Brown Integrative

After their nurse received treatment with the CellSonic VIPP in a neighbouring clinic, they decided to immediately purchase their own CellSonic VIPP and have experienced success with it.

# Global Market Presence

  
Wellness Centres

  
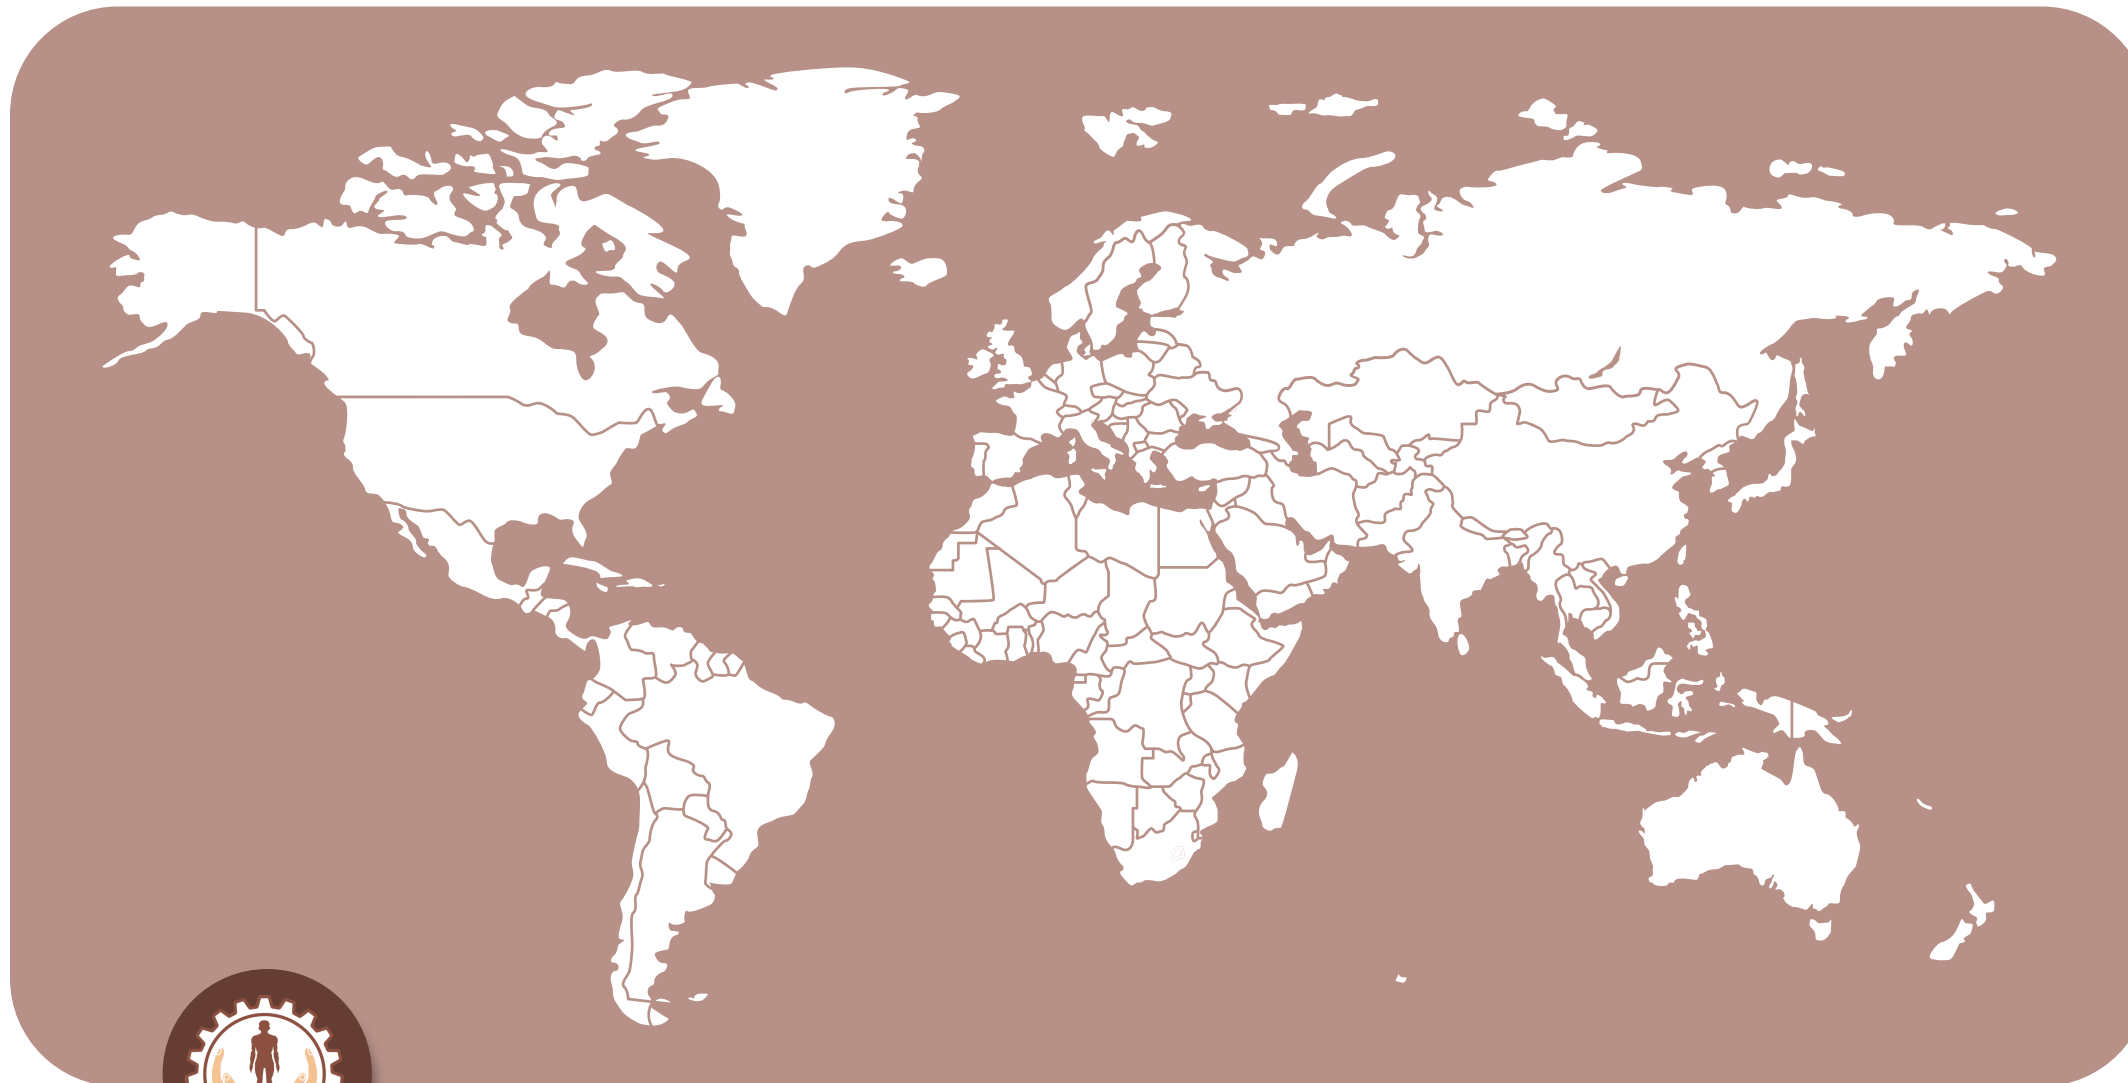

Hospitals

  
Private Clinics

CellSonic technology can be found across the world in leading clinics and wellness centres.

Patients travel continents to receive CellSonic VIPP treatment. The technology is mobile offering healing tours, retreats and mobile clinics.

## Vision & Mission

### Sapiens Shield

Sapiens Shield is a global project to eliminate chronic disease with CellSonic VIPP technology. Sapiens shield will set up clinics to serve an 8,000 local population for a routine check.

### Mission

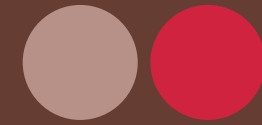

Plan to zero-chronic disease. To take elite healthcare treatment to the wider populations where they will be diagnosed and cured in 20 minutes years before developing symptoms. The result: zero new cases of chronic disease within that population.
