FOR MEDICAL PRACTITIONERS
EDITION 2026

NON-SURGICAL · DRUG-FREE · ANTI-AGEING

Clinical results. *Without the scalpel,* needles or drugs.

MONOPOLAR RADIOFREQUENCY

CellSonic Shape Machine

Drug-free body contouring, cellulite reduction and skin tightening.

Technology	**Monopolar RF**
RF energy	**Up to 25 W**
Session	**20–30 min**
Drugs required	**None**

No drugs
No medication, injections or prescriptions

No needles
Nothing enters the skin

No surgery
No anaesthesia or incisions

No downtime
Back to daily life straight away

Price on request, sent directly to your practice.

MONOPOLAR RADIOFREQUENCY

Shape Machine

Body contouring, cellulite reduction and skin tightening

The CellSonic Shape Machine uses **monopolar radiofrequency (RF)** to send controlled heat deep into the dermis and the fat beneath it. This stimulates **collagen renewal and dermal regeneration** (thermolifting), firms lax skin, smooths cellulite and reduces localised fat deposits.

No drugs, no needles, no surgery and no systemic side effects. Fat cells are broken down by heat and cleared naturally by the body. Suitable for the face and the body, with no downtime and no consumable applicator tips.

CELLSONIC SHAPE · RF PROBE

25 W RF

25 W	4 modes	1–30 min	2.7 kg
Maximum RF energy delivered	Selectable pulse patterns for every area and depth	Programmable treatment timer with auto-stop	Portable console 265 × 112 × 235 mm

Four treatment modes

Deep
Sustained energy for moderate to deep fat over larger areas, with built-in tissue recovery.

Intensive
Near-continuous delivery for stubborn, localised fat. Monitor skin temperature closely.

Comfort
Longer rest between cycles, so less heat builds up in sensitive areas.

Surface / Facial
Rapid, gentle bursts for shallow deposits, small areas and the face.

The treatment in practice

RF body treatment: the probe is kept in gentle contact with the skin and moved over the area, with conductive gel.

Benefits for your patients

- Firmer, tighter skin, with collagen stimulation
- Smoother appearance of cellulite
- Localised fat reduction and contour refinement
- A redefined facial oval and jawline
- Improved skin texture and elasticity
- A relaxing treatment with immediate return to normal activity

Clinical results

Cellulite and contour. Refined Health, England.

Indications

- Localised fat, cellulite and dimpling
- Skin laxity, sagging and post-partum laxity
- Facial oval reshaping and thermolifting
- Abdomen, flanks, hips, buttocks, thighs, arms, face and neck

Treatment protocol

- **Session:** 20–30 min per area. Start at a low energy and increase to patient comfort.
- **Course:** weekly for 8–10 sessions, or every 1–2 weeks for about 8, then monthly maintenance
- **Recovery:** mild redness that usually fades within about 30 min

Technical specification

Technology	Monopolar radiofrequency, microprocessor-controlled
RF energy delivered	Max. approx. 25 W
Treatment modes	4 pulse patterns: Deep, Intensive, Comfort, Surface
Energy levels	1–10, adjustable during treatment
Treatment timer	1–30 min in 1-min steps, auto-stop with alert
Outputs	Single probe, one area at a time
Display	4 × 20 LCD: energy, mode, time, fault status
Supply voltage	91–253 V AC, 50–60 Hz (universal)
Power consumption	60 W max.
Electrical safety	Class II · Type BF applied part · IP20 · CE marked
Dimensions	265 W × 112 H × 235 D mm
Weight	2.7 kg
Coupling medium	Standard conductive gel
Calibration / servicing	None required
Supplied with	Console, monopolar RF probe, operations manual, treatment guide

Shape Machine compared with the alternatives

OPTION	DRUGS OR SURGERY	SIDE EFFECTS	WHEN TREATMENT STOPS	COST
GLP-1 weight-loss injections	Weekly prescription drug	Nausea, vomiting, constipation common	Weight returns, about 2 lb a month on average	Patient pays about $150–$450+ every month, indefinitely
Liposuction	Surgery and anaesthesia	Bruising, swelling, surgical risk	Permanent removal	High fee per procedure, plus recovery time
Premium RF platforms	None	Transient redness	Maintenance sessions	Clinic pays $60k–$110k, plus tips up to $1,800 each
CellSonic Shape Machine	**None: no drugs, no needles**	**No systemic side effects**, mild redness only	Monthly maintenance	**Price on request**, no tips or cartridges

Sources: 2026 self-pay GLP-1 prices (HealingMaps, JumpstartMD); weight regain from the Oxford/BMJ analysis of 37 studies (reported Jan 2026); device costs from The Device Pulse. Shape is a localised body-contouring treatment, not a medical weight-loss therapy.

Contraindications: pacemakers or other electronic implants, metal implants in the area, pregnancy or breastfeeding, cancer, epilepsy, bleeding disorders or anticoagulants, active skin infection, wounds or rosacea, filler or toxin in the area within 2 weeks, uncontrolled diabetes, keloid tendency and photosensitising drugs. See the Operations Manual for the full list.
