# ABOUT THIS COURSE

A Doctorate of Philosophy proves that you are an expert in your subject. You have understood and explained fully the principles of science and logic that apply to your studies.

**CERTIFIED**

There will have been new ideas generated and areas for further research discovered.

**DISCOVERY**

You have made progress and with a CellSonic degree you have contributed to saving lives.

**SAVING LIVES**

# APPLICATION

---

## 01. HOW TO APPLY

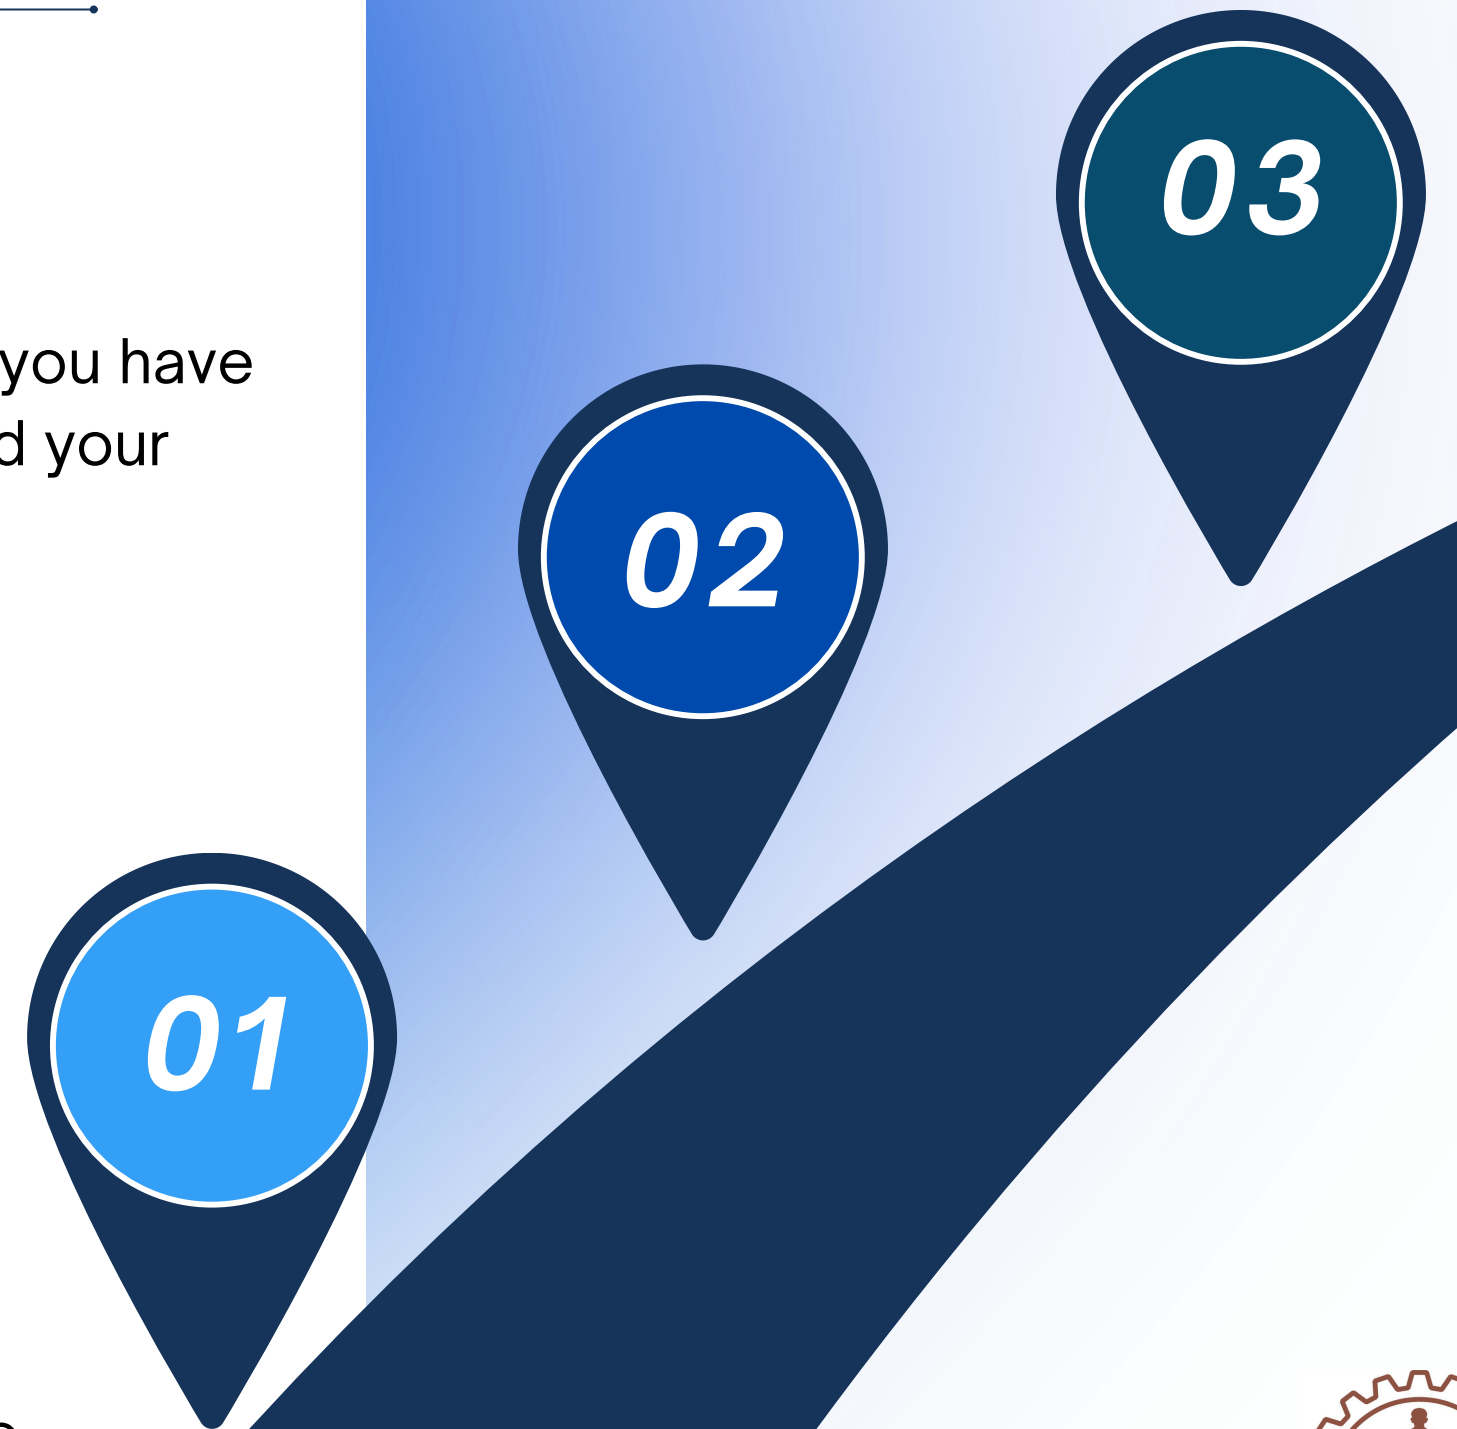

- To get on a Doctorate course with CellSonic you have to apply by email telling us about yourself and your ambitions.

## 02. PRE-REQUISITES

- You will need to own or have constant use of a CellSonic machine. No other academic qualifications are required.

## 03. SELECTION CRITERIA

- You will be accepted for the course according to your knowledge and intelligence which you will demonstrate in your initial email. It can be accompanied by attachments.
- All communication must be in English.

CellSonic

# WRITING THE THESIS

## Language ✓

A thesis has to be written. If your native language is not English, write in your preferred language and use a translation programme to convert to English.

## Guidance ✓

Do not try to write English if you are not completely confident in the language. Guidance will come from Professor Andrew Hague with whom you will talk in English on Skype.

## Final Thesis ✓

Perfect English is not required. He will understand. The translated thesis will be in good English.

CellSonic

# PROFESSOR ANDREW HAGUE

Professor Hague is the founder of CellSonic and has developed its applications

to the extent that this technology is now the ultimate in biophysics

which sits alongside biochemistry and psychology as one of the three branches of medicine.

CELLSONIC IS ALL

**BIOPHYSICS**

**IN ONE PACKAGE**

# THE COURSE

## Ideation

When the professor accepts that you have the ability to complete a PhD course, he will discuss with you the idea that will form the basis for your dissertation.

## Certification

When that is agreed, an invoice will be issued for the course fee. This covers everything including the final certification.

## Full Support

You will not enter the course unless the professor is sure you can complete it to the high standard required. Only when you are accepted for the course do you make a payment.

# DURATION

**START**

The time taken to complete the course is up to you.

**1 YR**

It may be one year if you already have a lot of material prepared.

**4 YRS**

If you are starting from scratch it could take four years especially if you are working on the PhD part time.

**SUPPORT**

You will be guided at every step by Professor Hague with whom you will communicate by email and Skype.
